

# Debarking with real speed

**A POSCH professional debarking machine turns each log into a neat post at top speed.**

For minor tasks or complete fences, the professional top-class debarking machines are precisely the right choice. Peeling and pointing in one work step is no trouble at all. The sturdy design and the high peeling disk quality make sure that you are well-equipped for peeling innumerable logs.

**Debarking machine**  
The post-producing machine  
see page 154

**SchälProfi**  
The solution for professionals  
see page 155

Peeling of posts in no time

# Top-class professional debarking machines

- Peeling disk with a diameter of 50 cm
- Peeling capacity up to 9 running metres/minute
- On request, for posts over 3 metres

Debarking machine

## Debarking machine

For pointing and peeling posts.

### Debarking machine

<b>Timber diameter max. cm</b>	15
<b>Mode of operation</b>	Manual peeling process
<b>Number of knives per peeling disk</b>	4 pcs.
<b>Peeling disk thickness</b>	10 mm
<b>Weight min/max. kg</b>	112/172
<b>Transportation</b>	Solid rubber wheels ø 25 cm
<b>Drive</b>	Tractor  E-motor  Combination
<b>Technical details</b>	→ from page 154

Schälprofi

**NEW!**  
Now available with log saw attachment

## SchälProfi

The professional machine for pointing and peeling.

### SchälProfi

Easily debark and sharpen round timber

## Turn each log into a post in no time

The machine is convenient and safe to operate, debarks any round timber and prepares it for the required use.

### **Debarking machine: Considerable upgrade for scrap wood**

Safely and quickly debark your logs by guiding them towards the debarking disk via the tilted support.

### **SchälProfi: now with log saw attachment**

Enables debarking and sharpening in one work step. With the debarking machine for professionals, the log only has to be placed on the feeding device, and the debarking process is started automatically. With the infinitely adjustable feed, you can easily adjust the surface quality and so get your desired result more quickly. With a log diameter of 24 cm, the machine achieves 9 running metres per minute. The gripping device, the built-in ejector fan for discharging the chips produced and the optional guide for logs that are more than 3 metres long make peeling as easy as possible.

NEW: split posts in two easily with our log saw attachment.

# Debarking machine

peels and points posts with ease.

400 V

- **Timber diameter max.** 15 cm
- **Mode of operation** manual peeling process
- **Number of knives per peeling disk** 4 pcs.
- **Peeling disk thickness** 10 mm
- **Transportation** Solid rubber wheels ø 25 cm
- **Inclined support and peeling disk protection**

### The log saw attachment for our SchälProfi

Perfect to debark, sharpen and cut fence posts – many applications from a single device.

### One machine – many possibilities

The SchälProfi itself debarks and sharpens pieces of lumber. Our log saw attachment cuts them in half when needed.
